SHRIMP

SEAWEED ANIMAL FEED SUPPLEMENT

This natural feed additive for farmed shrimp is a blend of sustainably sourced seaweeds that have been carefully selected for their bioactive compounds.

Our environmentally friendly solution for shrimp aquaculture delivers a multitude of polysaccharides, minerals, trace elements and other essential bioactives. Together, these play a key role in boosting the immune system, improving digestive capacity, increasing breeding efficiency and lowering infection and mortality rates.

Nutri-San Shrimp is a 100% natural product that improves disease resistance through its antiviral and antibacterial properties, reducing the need for synthetic antibiotics and ensuring healthier more profitable shrimp with improved taste and texture.

Produced from seaweed harvested exclusively for Nutri-San, our biodegradable supplements contribute to responsible shrimp farming by offering a sustainable solution for aquatic ecosystems.

PROVEN BENEFITS

- Replacement for mineral mixes
- 25% lower mortality rate
- Higher weight gain (up to 5% heavier)
- Effective against viral diseases
- Improved taste and texture
- Improved gut absorption surface
