

nutri-san SWINE

SEAWEED ANIMAL FEED SUPPLEMENT

A 100% natural feed additive for piglets, sows, growers and finishers, Nutri-San Swine provides a unique combination of seaweed polysaccharides, minerals, trace elements and other bioactives which promote health, improve growth and prevent deficiencies.

Rich in bioactive compounds scientifically shown to have prebiotic effects, our swine formulation has a significant impact on gut health. By increasing the overall diversity of microbiota and supporting the hind gut, improved digestion of feed is achieved while naturally chelated minerals in colloidal form are easily absorbed and utilized by the animal.

Nutri-San Swine supports the immune system, enhances fertility, promotes optimal body condition and assists in reducing mortality rates. In addition, our seaweed supplement contains naturally occurring anti-wormer compounds.

In short, this environmentally friendly solution helps produce healthy animals and results in noticeably superior meat quality.

PROVEN BENEFITS

- Reduces mortality by up to 50%
- Eliminates / reduces need for antibiotics
- Reduces parasitic worms
- Improves FCR (up to 8% reduction)
- Reduces ammonia levels in waste
- Improves meat taste and texture
